

YASIR KHAN

Riyadh, Saudi Arabia | Transferable Iqama | Available for Immediate Joining

+966 53 149 3948 | imyasil308@gmail.com | <https://www.linkedin.com/in/yasir-khan308> | <https://github.com/YasirSkhan>

PROFESSIONAL SUMMARY

AI/ML Engineer with 4+ years of experience developing machine learning systems, AI automation solutions, and data-driven applications across government, industry, and research environments. Experienced in end-to-end ML pipelines, document classification, LLM fine-tuning (LoRA/QLoRA), RAG, and AI workflow automation using Python and n8n. Built a document classification system processing 500,000+ government records with 95% accuracy, reducing manual errors by 70%. Strong background in Generative AI, cybersecurity, data privacy, and production-oriented AI systems.

EDUCATION & TRAINING

Bachelor of Science in Computer Science (BS-CS)

2017 — 2021

CGPA 3.46 / 4.00 | Class Rank: Top 3%

Abdul Wali Khan University Mardan, Pakistan

- **Relevant Coursework:** Artificial Intelligence, Data Structures & Algorithms, Network & Data Security, Software Development
- **Final Year Project:** Email Spam Classification Using **MultiNomial Naive Bayes** Machine Learning Algorithm

Diploma In Information Technology — Marks 1095 / 1400

2017 — 2018

- **Relevant Coursework:** Office Automation, Web Development, Database Management (SQL & MS Access), Programming

WORK EXPERIENCE

Lab Instructor and Technologist

Feb 2026 — July 2026

University of Technology (UoT)

Nowshera, Pakistan

- Designed and delivered hands-on **Python-based data and machine learning workflows**, covering data preprocessing, exploratory data analysis, visualization, and introductory ML techniques.
- Guided undergraduate projects involving **data collection, preprocessing, analysis, visualization, and predictive modeling**, helping students translate real-world problems into data-driven solutions.
- Conducted laboratory experiments in **Operating Systems and Big Data Analytics**, developing practical experience with system-level programming, large-scale data processing, and analytical workflows.

Software Engineer - Remote

Dec 2025 — Present

Que Dot Inc.

Toronto, Canada

- Designing and integrated AI-based solutions into existing software systems to automate business workflows and improve operational efficiency.
- Implementing AI-driven automation pipelines using Python and n8n to reduce manual processing and streamline repetitive tasks.
- Developing custom n8n nodes and webhook integrations to connect AI services with CRMs, databases, and internal platforms.

Machine Learning Engineer

Nov 2023 — Dec 2025

Department of Science & Technology and Information Technology (ST&IT)

Civil Secretariat, Peshawar, Pakistan

- Under **Paperless Governance** Initiative, Implemented a document classification system utilizing machine learning algorithms, classified over **500,000 documents with an accuracy rate of 95%**, significantly **reducing manual errors by 70%**
- Leading **data preprocessing** efforts by developing and implementing pipelines for **data cleaning, feature engineering, and normalization**, ensuring high-quality, clean, and properly formatted datasets.

Machine Learning Intern — Remote

Sept 2024 — Aug 2025

AI Explain You Science (AIEYS) – **Supervisor:** Dr. Inam Ullah

Islamabad, Pakistan

- Working on **Electric Vehicles Charger Attacks (CICEVSE2024) Dataset**, comprising of power consumption data, network traffic captures, and host activities under both benign and attack conditions.
- Developing **Machine Learning & Deep Learning algorithms** to detect and mitigate malicious activities, ensuring **safety and reliability of critical infrastructures**

AI Curriculum Consultant

May 2023 — August 2023

Department of Science and Technology & Information Technology

KPK, Pakistan

- Worked as a curricula consultant under the project titled “**Merged Areas Digital Connect**” to develop modern **cybersecurity & AI curriculum** to be taught at more than 15 training centers.
- Over **900 students** have been trained and educated on the specified curricula **across 15 centers**, ensuring not only successful completion of training and also **student placement in private sectors**.

InfoSec Intern – On-Site/Part-time

Corvit Systems Peshawar

July 2023 — December 2023

Khyber Pakhtunkhwa, Pakistan

- Built proficiency in **scalable and efficient codebases**, ensuring modularity and ease of reuse for machine learning tasks
- Achieved practical exposure in processing and **annotating large datasets**, improving model performance through **feature engineering and augmentation** techniques.

AI & Cloud Security Intern — Remote

Virtually Testing Foundation (VTF)

July 2023 — January 2024

Los Angeles, California, USA

- Collaborated on **AutoDetectNet**, applying **machine learning algorithms** for automated network vulnerability detection.
- Analyzed & documented cyberattacks, including **PoC exploitation tactics**, and mapped mitigation strategies to **MITRE ATT&CK**
- Gained hands-on experience with **cloud security, IAM, encryption, firewall configuration, compliance, and security monitoring** to strengthen data and infrastructure protection.

Young Professional Officer (YPO) — Full-time

Department of Finance, Government of Khyber Pakhtunkhwa

Nov 2021 — Nov 2023

KPK, Pakistan

- Worked under “Citizen Facilitation Centers” project to **develop automated systems that provide services** online such as online domicile service, Police Clearance service etc.
- Ensured **data security and privacy** during post-deployment scenarios where third-party vendors access to system or data is a security risk.

PROFESSIONAL TRAINING & CERTIFICATIONS

- [Designing Agentic Systems with LangChain](#) **DataCamp**
- [Advanced Machine Learning Skill Track](#) by **365 Data Science** — 4 Courses
- [Google Cyber security Professional Certificate](#) **Specialization Course**
- [IBM Cyber security Analyst](#) by **IBM and Coursera** **Specialization Course**
- [Developing LLM Applications with LangChain](#) by DataCamp
- [Data Privacy and Anonymization](#) by datacamp
- [The Nuts and Bolts of Machine Learning](#) by **Google**
- [Introduction to NLP for AI](#) by **365 Data Science**
- [Introduction to Cloud](#) by **DataCamp**
- [Intermediate Deep Learning with PyTorch](#) **By DataCamp**

PROFESSIONAL PROJECTS

IntruderAlert: LLM-integrated Intelligent Intrusion Detection System for Electric Vehicles Charging Stations

Tech Stack: Scikit-Learn, Neural Networks, Fine-tuning, LLMs, Python, Numpy, streamlit

- Developed a binary & multiclass classifier using **tree-based ensemble learning techniques** to distinguish between benign and attack activities on charging stations, with Random Forest (**95.92% accuracy**) outperforming all other algorithms.
- **Fine-tuned Llama 3.1 7B** in a two-stage anomaly detection system, combining high-speed ML-based detection with LLM-driven, human-readable reports explaining anomalies and suggesting mitigation strategies.

HandTok: A Sign Language Translation Application — Python, OpenCV, React-Native, Flask, Keras, Sci-kit Learn

- Implemented **Convolutional Neural Network (CNN) for model training** on two large sign language datasets, **OpenCV for hand landmarks detection**, and used **Adam Optimizer** for model optimization, resulting in an impressive **accuracy of 98%**.
- The application enables smooth communication for **hearing & speech-impaired individuals by converting gestures into written text & spoken language**, and vice versa.
- Achieved real-time accurate translation, user-friendly interface design, and promotion accessibility for impaired people

LANGUAGE SKILLS

International English Language Testing System (IELTS)

Overall: 7.5 **Listening:** 8.5 **Writing:** 6.5 **Reading:** 8.0 **Speaking:** 7.5

Native Languages: Urdu | Pashto

TECHNICAL SKILLS

- Programming Languages:** C++ , Python (Advanced) , MongoDB , HTML , HTML, JavaScript
- Machine Learning & Deep Learning:** Scikit-learn , Keras , Einops & Einsum, , PyTorch , LLMs, CNNs, GANs, RNNs, Ensemble Learning
- Data Analytics & Image Processing:** Numpy , Pandas , Seaborn , Matplotlib , Plotly , OpenCV , Streamlit
- LLMs & Generative AI:** LLM Fine-Tuning (LoRA/QLoRA), Llama 3.1, Prompt Engineering, LLM-Integrated Systems, Retrieval-Augmented Generation (RAG), LangChain, LangGraph, Vector Databases (Chroma, Pinecone, FAISS)
- AI Automation & Integration:** n8n, Workflow Automation, Webhook & API Integration, CRM/Database Integration, AWS Cloud, Git/GitHub

AWARDS & PROGRAMMING COMPETITIONS

- Winner (60+ teams) in inter-universities Speed Programming Contest — Northern University, Wattar Campus, 2019 [Certificate](#)
- Runner-up (30+ teams) in Emerging Technologies Competition (ICUETC-18) — Islamia College University, Peshawar, 2018 [Certificate](#)
- Intern of Excellence Award (Among 100+ interns)— Virtually Testing Foundation 2023
- Topped my District in English Essay Competition — District Youth Affairs Nowshera, 2023 [Certificate](#)
- Ranked 5th in Cyber security Training CTF Contest — Ignite National Technology Fund, 2023 [Certificate](#)
- Machine Learning Summer School — Cohere Labs Open Science Community [Certificate](#)
